

Benefits 優勢

- Easy to use: set up the pump in seconds using intuitive icon based menus 易於使用：使用直覺式圖標選單在幾秒鐘內設定泵
- Flexibility: Analogue Remote control options include 4 to 20mA, 0-10V (Modbus, Profibus and/or SCADA)
靈活性：類比遠程控制選項包括4至20mA、0-10V (Modbus、Profibus和/或SCADA)
- Local memory: each pump stores up to 30 dosing programs 記憶儲存：每個泵最多可存儲30個加藥程式
- Precision metering: 4000: 1 turndown 精密計量：4000:1調低
- Protection: USB backup of programs and Pump History 保護：USB備份程式和泵浦使用記錄
- Remote Monitoring with the Verderflex asset management IoT software 使用Verderflex資產管理物聯網軟體進行遠程監控
- Secure: Multi Level Password Access 安控：使用權限為多層級密碼設定

Verderflex Vantage 3000

These pumps are perfect for laboratory applications such as dosing low volumes of shear sensitive fluids. Different models have different capabilities including simple manual transfer, remote control using external signals or switches or programmable dosing. Some of the models can be equipped with multiple heads for multi-channel pumping requirements.

這些泵非常適合實驗室應用，例如給低體積的剪切敏感流體配量。不同型號具有不同的功能，包括簡單的手動傳輸、使用外部訊號或開關的遠程控制或可程式設計劑量。一些型號可以配備多個泵頭，以滿足多通道泵送的要求。

Your benefits 使用好處

- Easy tube change in seconds 幾秒鐘內輕鬆換管
- Economic manual transfer version 經濟式手動輸送版
- Programmable dosing 可程式設計加藥
- Remote speed control options: 0-10V, 4-20mA and potentiometer inputs
遠程速度控制選項：0-10V、4-20mA和電位計輸入
- Simple keyboard programming 簡單的鍵盤程式設計

Technical details 技術數據

Max. Flow rate 最高流量	3,25 l/min
Max. Discharge pressure 最高吐出壓力	2 bar
