

# G-Bio Biogas Progressing Cavity Pumps

In a Biogas Plant the G-Bio model is used to convey fermenting substrates effectively into the plant.

## Advantages:

- Large capacity and pressure range - Capacities up to 70 m<sup>3</sup>/h -Pressures up to 48 bar
- Maximum homogenisation of the substrates
- Continuous, low-pulsation conveyance
- High operational reliability
- Rectangular feed hopper with vertical walls and adaptable length
- High solids content, up to 45%
